ONE-DAY SCHOOL

Educating Children for Eternity

CHRISTIAN EDUCATION

There are millions of children living in the world right now that do not have an opportunity to go to school. They will live out life much as their parents and grandparents did—engaged in hard labor, struggling for a daily subsistence.

As Christians, we have a responsibility to help meet the urgent needs of the impoverished. Providing access to education is one important way to do that. By giving one child a chance to go to school, you can make a tremendous impact. Imagine what can happen if you enable 40 children to go to school, every year, for the life of that classroom.

Maranatha currently has requests for 80,000 classrooms around the world. The One-Day School was created out of that great challenge. The result is a an opportunity that will give you a chance to change the world.

The One-Day School can be built quickly and economically in areas that need education facilities the most. The design is appropriate for a single classroom or a complete school campus.

By building school classrooms, you will create opportunities for children to get an education. But more importantly, by investing in the One-Day School, you will provide a place where students will be introduced to Christianity, which will change their lives forever.

The classroom components are packed in a container and shipped to their destination.

The concrete slabs are poured ahead of time.

The entire classroom can be completed in one day.

Roof, window and end-wall venting create natural, "chimney-effect" cooling.

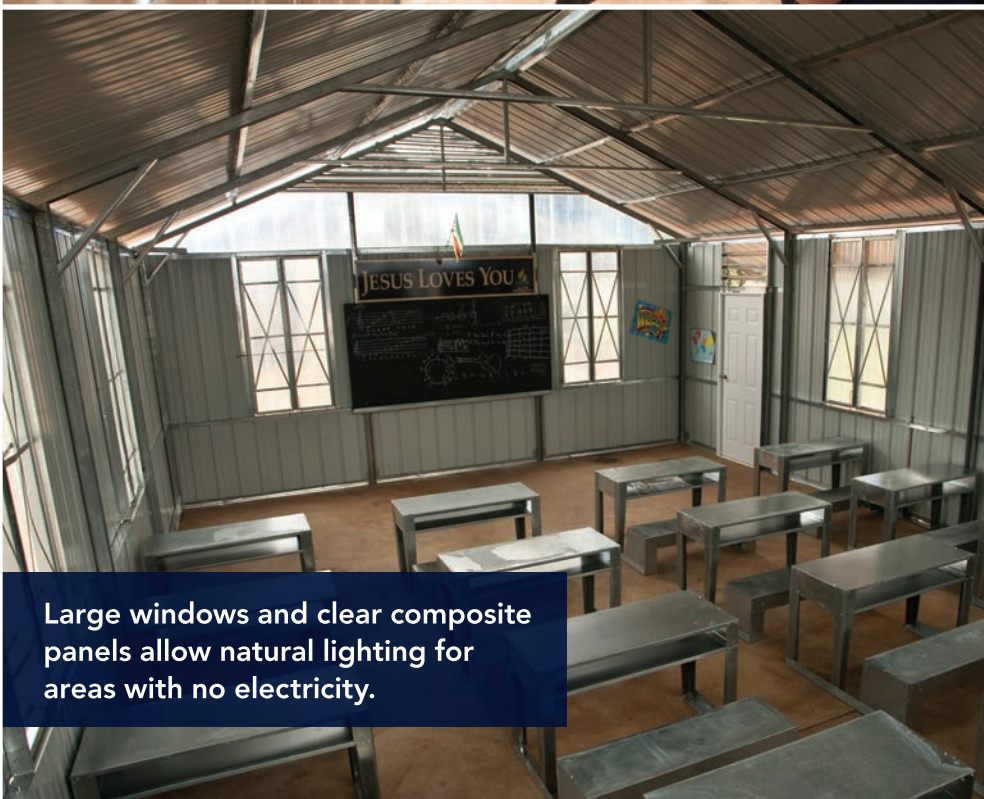

The structure is made of galvanized steel for long life.

Walls are made of premium, earth-tone steel panels.

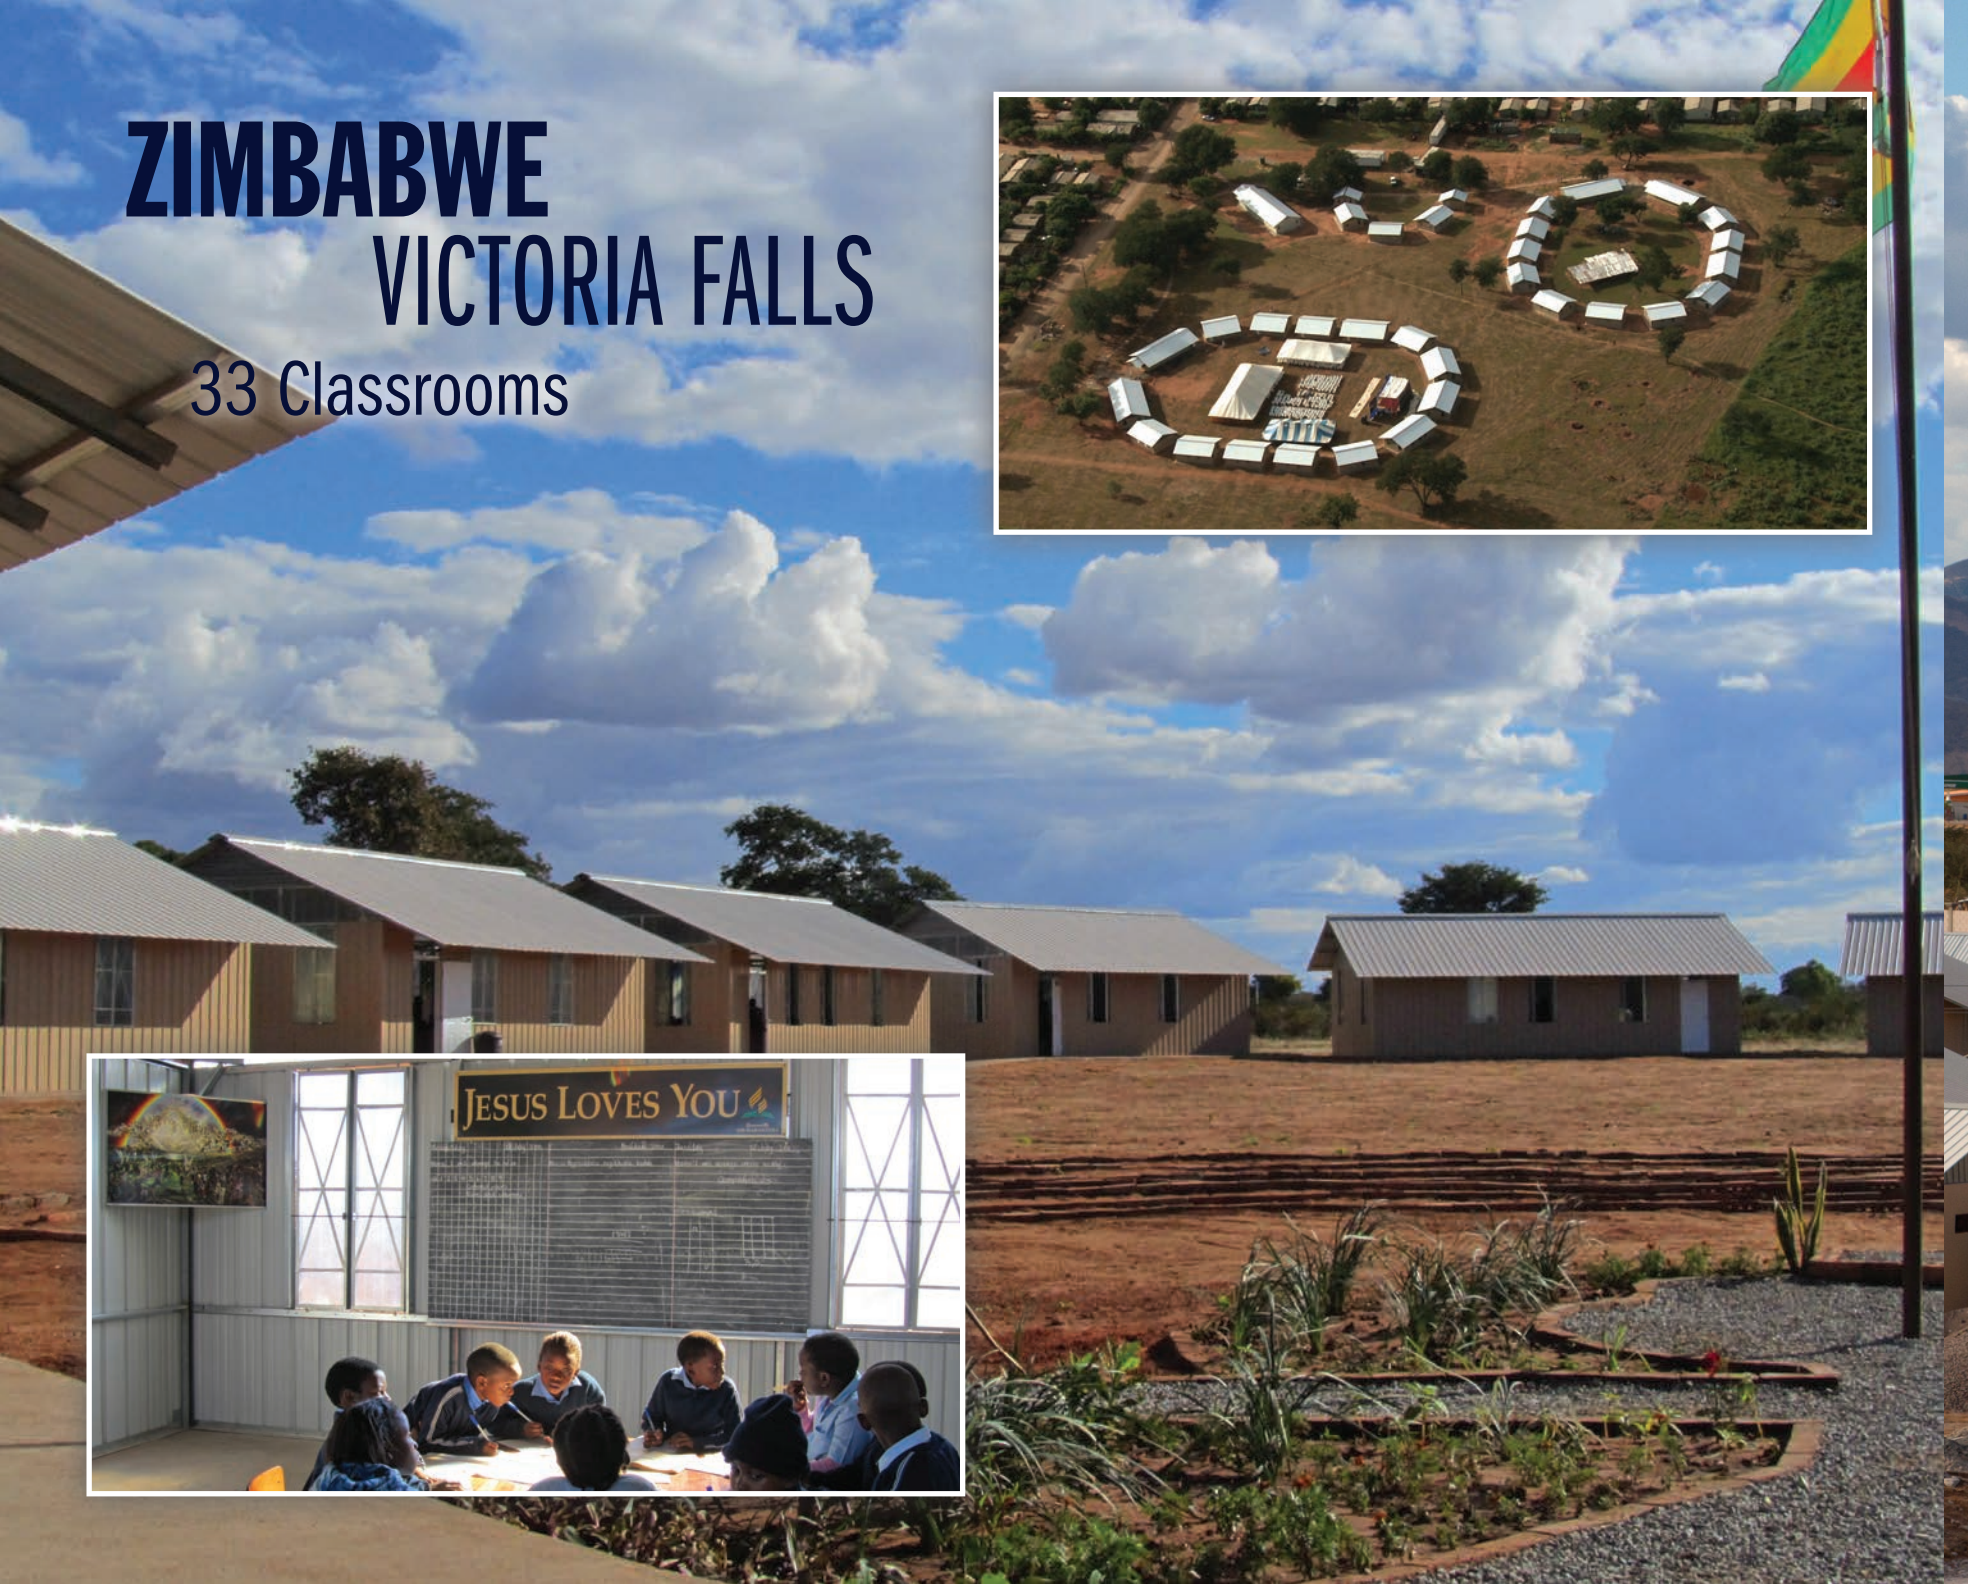

Steel desks accommodate 40 students per classroom.

Large windows and clear composite panels allow natural lighting for areas with no electricity.

THE ONE-DAY SCHOOL STRUCTURE

THE COMPONENTS OF A SCHOOL

It's been nearly four years since the introduction of the first One-Day Church. Since then, Maranatha and ASI have together built more than 2,700 churches and 300 schools around the world.

JOURNEY OF THE ONE-DAY STRUCTURE

- 1 All components are built at a factory in Dodge Center, Minnesota.
- 2 The parts are packed into a container. Forty One-Day Churches fit into one container.
- 3 The containers are shipped to various countries. The journey can take up to two months.
- 4 Local Adventist church leadership arranges customs clearance.
- 5 The containers are trucked to a staging point, and parts are unloaded and sorted. Then individual kits are delivered to the final building site.

HOW YOU CAN HELP!

Maranatha has received requests for more than 80,000 One-Day School classrooms. To respond to these requests, we need your support.

Help Build a One-Day School

Maranatha has a number of volunteer projects planned around One-Day School projects. To find the right project for you, visit our project calendar at maranatha.org.

Help Sponsor a One-Day School

You can sponsor a share of a One-Day School for \$5,000.

If you would like to sponsor the cost of a full campus, please contact Maranatha.
