

What does it take to build a church in the **DOMINICAN REPUBLIC?**

Every Maranatha church begins with a prayer of faith.

But from there, we've got blocks, cement, doors, paint, and much more!

17 gallons of paint

1 One-Day Church frame

4,240 feet of rebar

13 window grids

30+ volunteers

2 doors

1,300 blocks

305 bags of cement

In the **Dominican Republic**, we're building the entire church, and by the time we've poured the foundation, shipped the supplies, mobilized volunteers, and painted the walls, **a church** in the Dominican Republic **costs Maranatha \$40,000**.

If you can help, please make a donation today! **Any amount helps!**
