

Quality Christian education has long been a pillar of the Seventh-day Adventist Church. In fact, the Adventist Church runs one of the largest Christian school systems in the world.

But the impact of this tradition is creating an overwhelming challenge. There is a growing demand for Christian schools yet we lack enough facilities. In many parts of the world, existing campuses are in need of serious renovation. In some areas, there are no schools at all despite there being a robust Adventist community.

In recent years, Maranatha has received requests for nearly 80,000 classrooms from around the world. This need for more schools requires a system that is affordable, easy-to-build and transport, and effective in serving the needs of the students and teachers.

The One-Day School was born from this great challenge.

How You Can Help

You can support the construction of schools around the world by making a gift to Maranatha.

- Make a general donation to the One-Day School program.
- Sponsor a share of the One-Day School for \$5,000. You'll receive a photo of the completed campus along with GPS coordinates.

You can also help the mission of Maranatha by donating to our general fund. Make a gift online at www.maranatha.org or call (916) 774-7700.

Maranatha spreads the Gospel throughout the world as it builds people through the construction of urgently needed buildings.

The One-Day SCHOOL

Maranatha Volunteers International

ABOUT THE ONE-DAY SCHOOL

The versatile One-Day School (ODS) building can be used as a single classroom or in quantity to create a complete campus. A single ODS kit comes with a galvanized steel frame, roof, and walls. The entire building can be constructed in one day.

The ODS is strong, simple to construct, and easily transported to remote locations, where traditional construction would be next to impossible.

The Components of a School

Large windows and clear composite panels allow for natural lighting for areas with no electricity.

The galvanized steel roof keeps the classroom dry and reflects heat.

Each school is outfitted with a chalkboard, flag of the school's country, and a "Jesus Loves You" sign.

A One-Day School kit has 3,056 parts.

Each One-Day School kit weighs 3,390 lbs (including the desks).

Each classroom receives 20 steel desk and bench combinations, to accommodate 40 students.

Concrete slabs are poured before the structure components arrive.
