

What We're BUILDING

Take a look at the types of solutions Maranatha offers to those in need of construction assistance—and how you can help us meet the need.

One-Day Church

This program has been critical in responding to the requests for churches in the most isolated parts of the world, where traditional construction would be extremely difficult. Yet One-Day Churches can fill the need by providing a steel frame and roof. Then, church members build the walls with local materials.

COST: \$4,500
(SHARE: \$1,500)

Schools

Maranatha's largest structure is a school called the Education and Evangelism Center (EEC). It is a block construction building, featuring a long open space in the middle with classrooms, restrooms, and offices flanking both sides. The center space can be used as a gymnasium and an auditorium. The EEC can have six to twelve classrooms, with room for 40 students per room.

COST: \$500,000 - \$800,000.

One-Day School

Education is a tremendous need in the developing world, yet schools are very expensive to construct. The One-Day School is an effective solution. A kit comes with a steel roof and walls, windows, doors, and desks.

COST: \$15,000
(SHARE: \$5,000)

Wells

Water is a critical need in several of the countries where Maranatha is working. This year, Maranatha is focused on providing water wells in Zimbabwe and Kenya.

COST: STARTING AT \$10,000

Churches

Currently, Maranatha builds fully blocked churches in several of the countries where we are working. These sanctuaries have a steel frame and roof, cement foundation, walls, windows, doors, and platform. Some models even have bathrooms and Sabbath School classrooms. These churches range in cost from \$20,000 to \$75,000, depending on the size and country.

COST: \$20,000 - \$75,000
